Nineteen Hundred Eighty Five

Introduction

"A BETTER WAY OF LIFE"

Richmond Technical College is an "open-door" institute. To some people, this means an open door to a brighter future or A BETTER WAY OF LIFE.

There are many people in this community that haven't received a high school diploma. RTC has several courses offering a second chance for that diploma. These courses give an opportunity to open the door to some of the available jobs in and around the county. Having returned to school and earned a high school diploma gives a person a sense of pride in their achievement. Self-confidence is the key ingredient for A BETTER WAY OF LIFE.

There are people who like to learn something new, something to get them out of the rut of home—to the job—and back home again. RTC offers a wide variety of subjects to study in its Continuing Education Programs. In this program, one could learn anything from CPR to Self-Defense or even flower arrangement. The Continuing Education Program gives one the chance to better his community which leads to A BETTER WAY OF LIFE.

For those who may be a recent high school graduate and would like to further their education in a particular field, RTC offers many majors to choose from. If one cannot find a major that fits his particular interest, then he may take General Education which offers the student some classes in each of the Technical Curriculums.

RTC does everything possible to serve its community and supporters by offering a wide variety of educational choices to open door to A BETTER WAY OF LIFE.

"Kay, I told you not to drink that stuff!"

"What do you mean you need fingerprints?"

"How could I know your name?"

"I hate paying for school!"

DEDICATION

The 1985 "Valiant" is dedicated to two women who have been a special part of Richmond Technical College. They are the women whom students can trust and love because they always give their all and are willing to go that extra mile for not only the students, but also the school.

We are certainly encouraged by these women and hope they will continue to be that "Special" part of Richmond Technical College. We love you—

Ms. Jennifer Love

and

Ms. Lee Opata

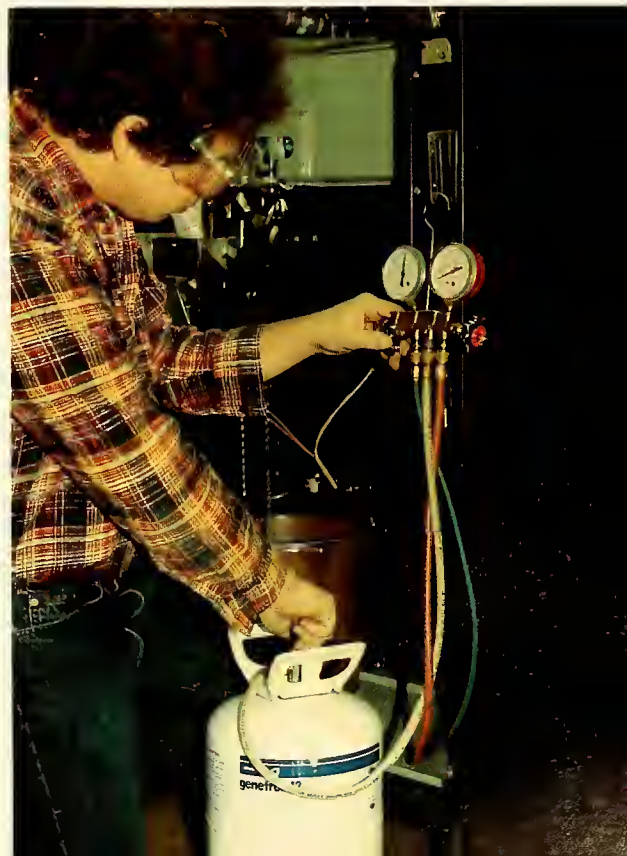

*If it were not for
the people listed below,
you would not have
this yearbook this early!*

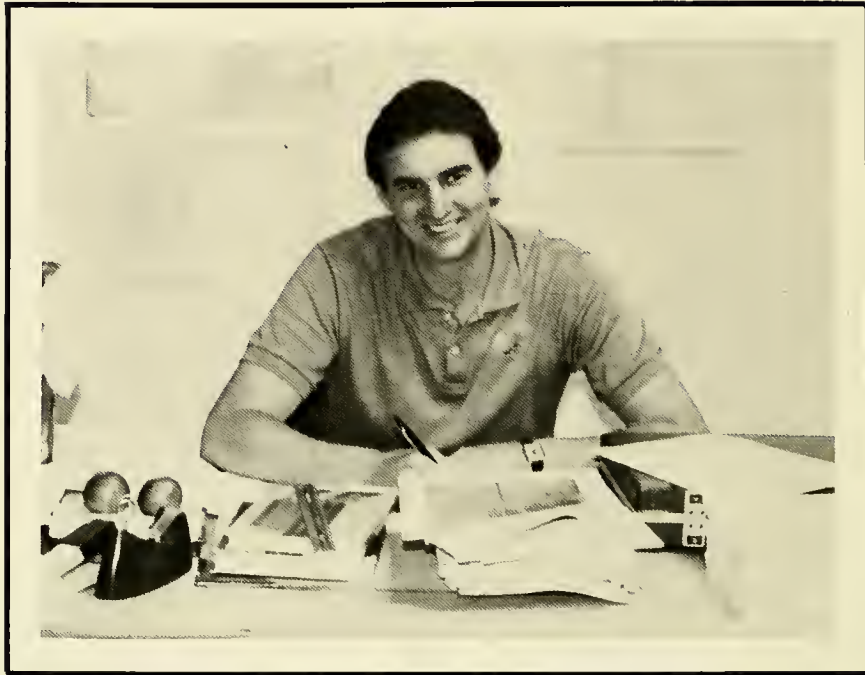

*Teresa Rush
Michael McDuffie
Jennipher Love
Jack Thomas*

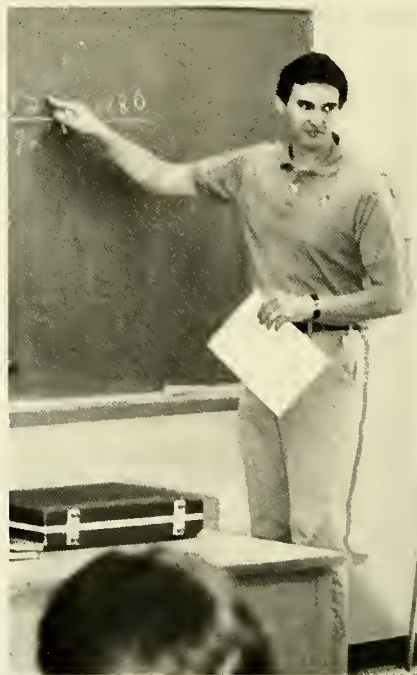

ABOVE: "Do they think we want those pens!"
 LEFT: "You mean its been only 20 years?"
 RIGHT: "If I set this, the bomb will go off at 4:00 a.m."

TEACHER OF THE YEAR FULL-TIME

We, the students of Richmond Technical College, have chosen Mr. Warner Shew as "Teacher of the Year", for his outstanding personality, and commitment to his school and especially his students.

He takes time out not only to listen, but also to explain thoroughly when it's needed. Thank you, Mr. Shew, for being "you."

TEACHER OF THE YEAR PART-TIME

We, the students of Richmond Technical College, have chosen Mrs. Lynn Evans as "Part-Time Teacher of the Year" for her understanding and enthusiastic way of teaching.

*She not only teaches class, but also makes class fun and exciting. To a woman who has unbelievable talents—
CONGRATULATIONS!!*

"Well, I
THOUGHT I
knew everything!"

"You're from the planet Sequk?"

"Where's the FOOD!"

"My ears are turning red!"

"Darn camera! It had to break on me!"

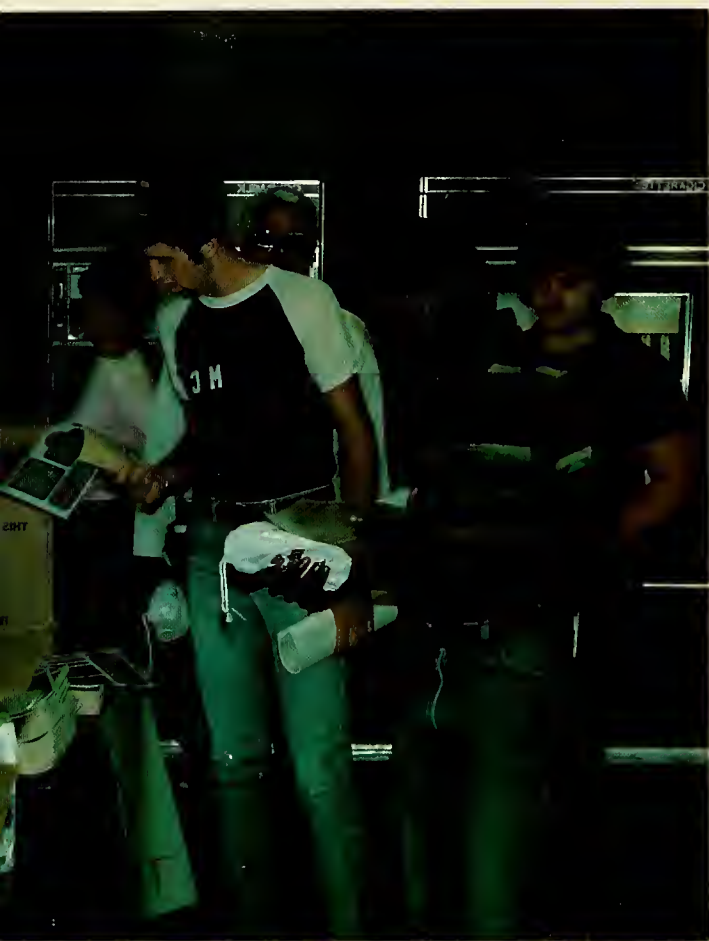

"I can't believe Michael ate the whole thing!"

"This damn paper never tears straight!!!"

"Please, guys, don't tell me another goofy story!"

"Gee, this morning I was male?"

"You mean I actually gave you a 100?!"

"You don't really expect me to believe that?!"

"Hey! Like this class is gonna be totally awesome!"

"I beg your pardon! Debra Baker, not Florence Johnson!"

Graduation 1984; why are Linda Wilson, Gail Bane, and Alice Bond smiling??

"Oh! No! You caught us!"

"Can I have your autograph on this card?"

"Hey! I'm cool man! Real cool!"

Mrs. Daggs in class! Spell it write Reading and Righting; Party don't study and run when Mrs. Daggs reads this!

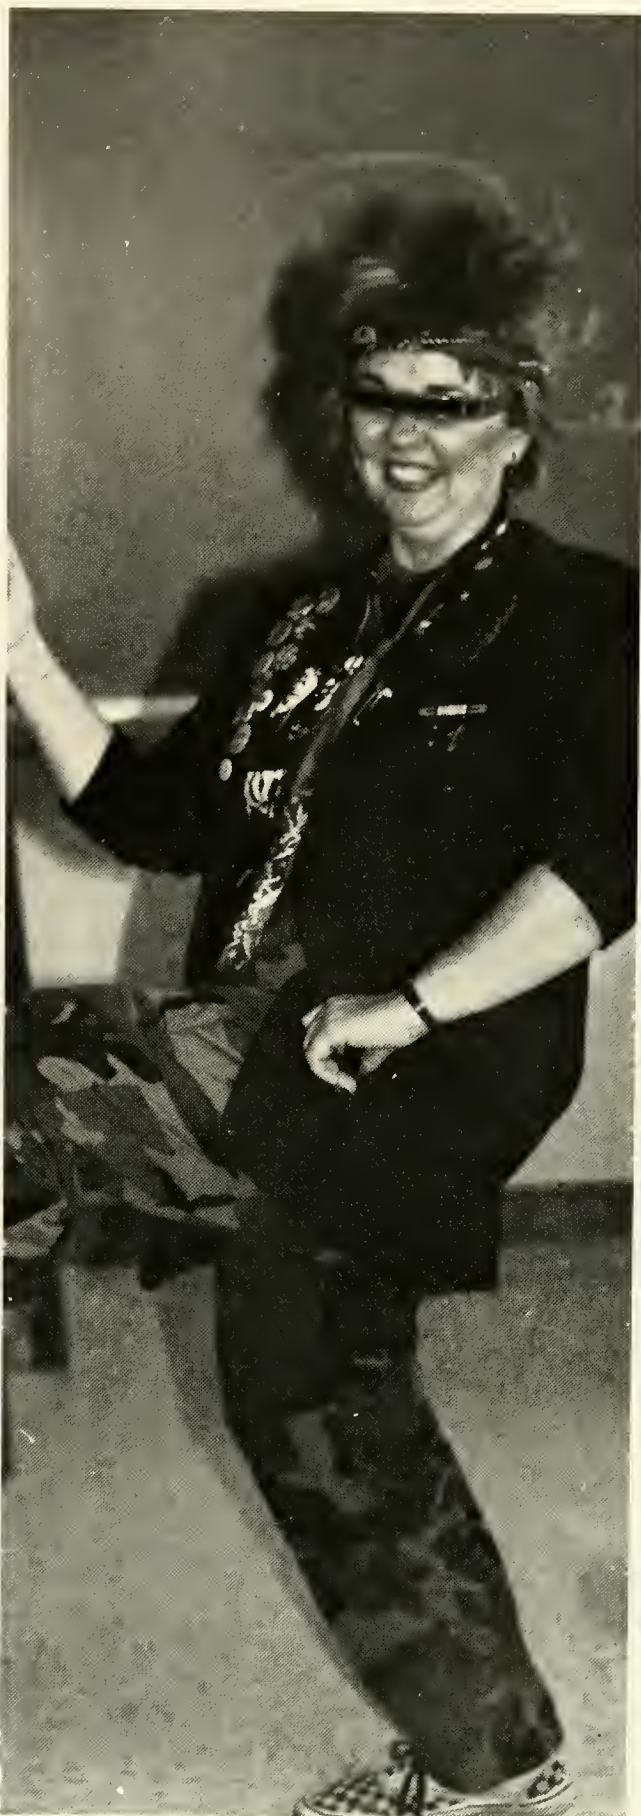

Jack Thomas told us, "We know what we're doing!"

Anything to keep the teacher from talking!

Class is over, school is out, and somebody will be here soon to help Mrs. Dodd.

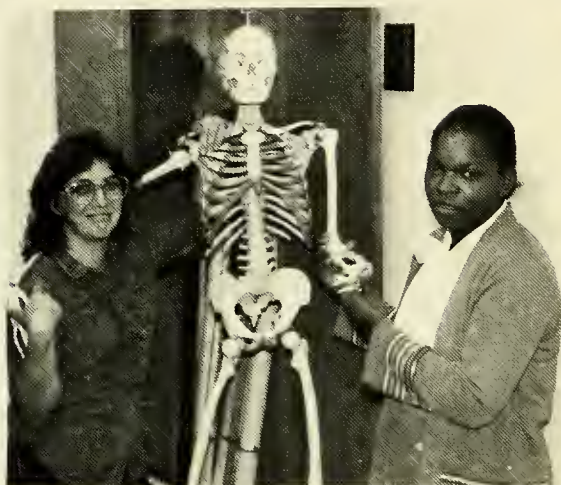

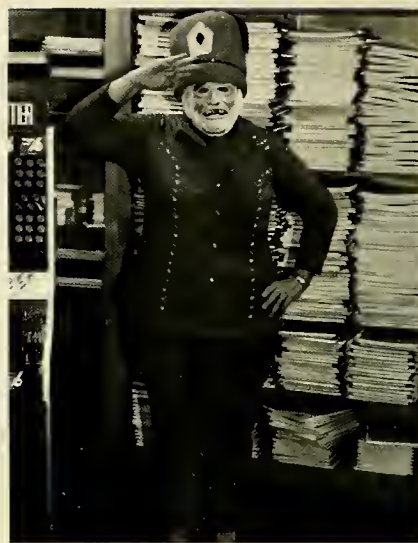

A L O O K A T R T C N O W

*I pity the fool who doesn't attend
RTC!!!*

*Relax! your local law enforcement
is at hand.*

Darling, we've never seen you looking better!

Those boys will surely break your back!

ABOVE: "Pucker up!"

LEFT: "Like, don't we look awesome."

Left: "We got ya, Mrs. Shaw"

Below: "I don't care if you are Democratic, you can't kiss me!!"

Above: "This really is a Playboy magazine"

Below: "Smile, you're on candid camera!"

Left: "We'll tip toe, through the tulips."

Right: "Full Moon?!"

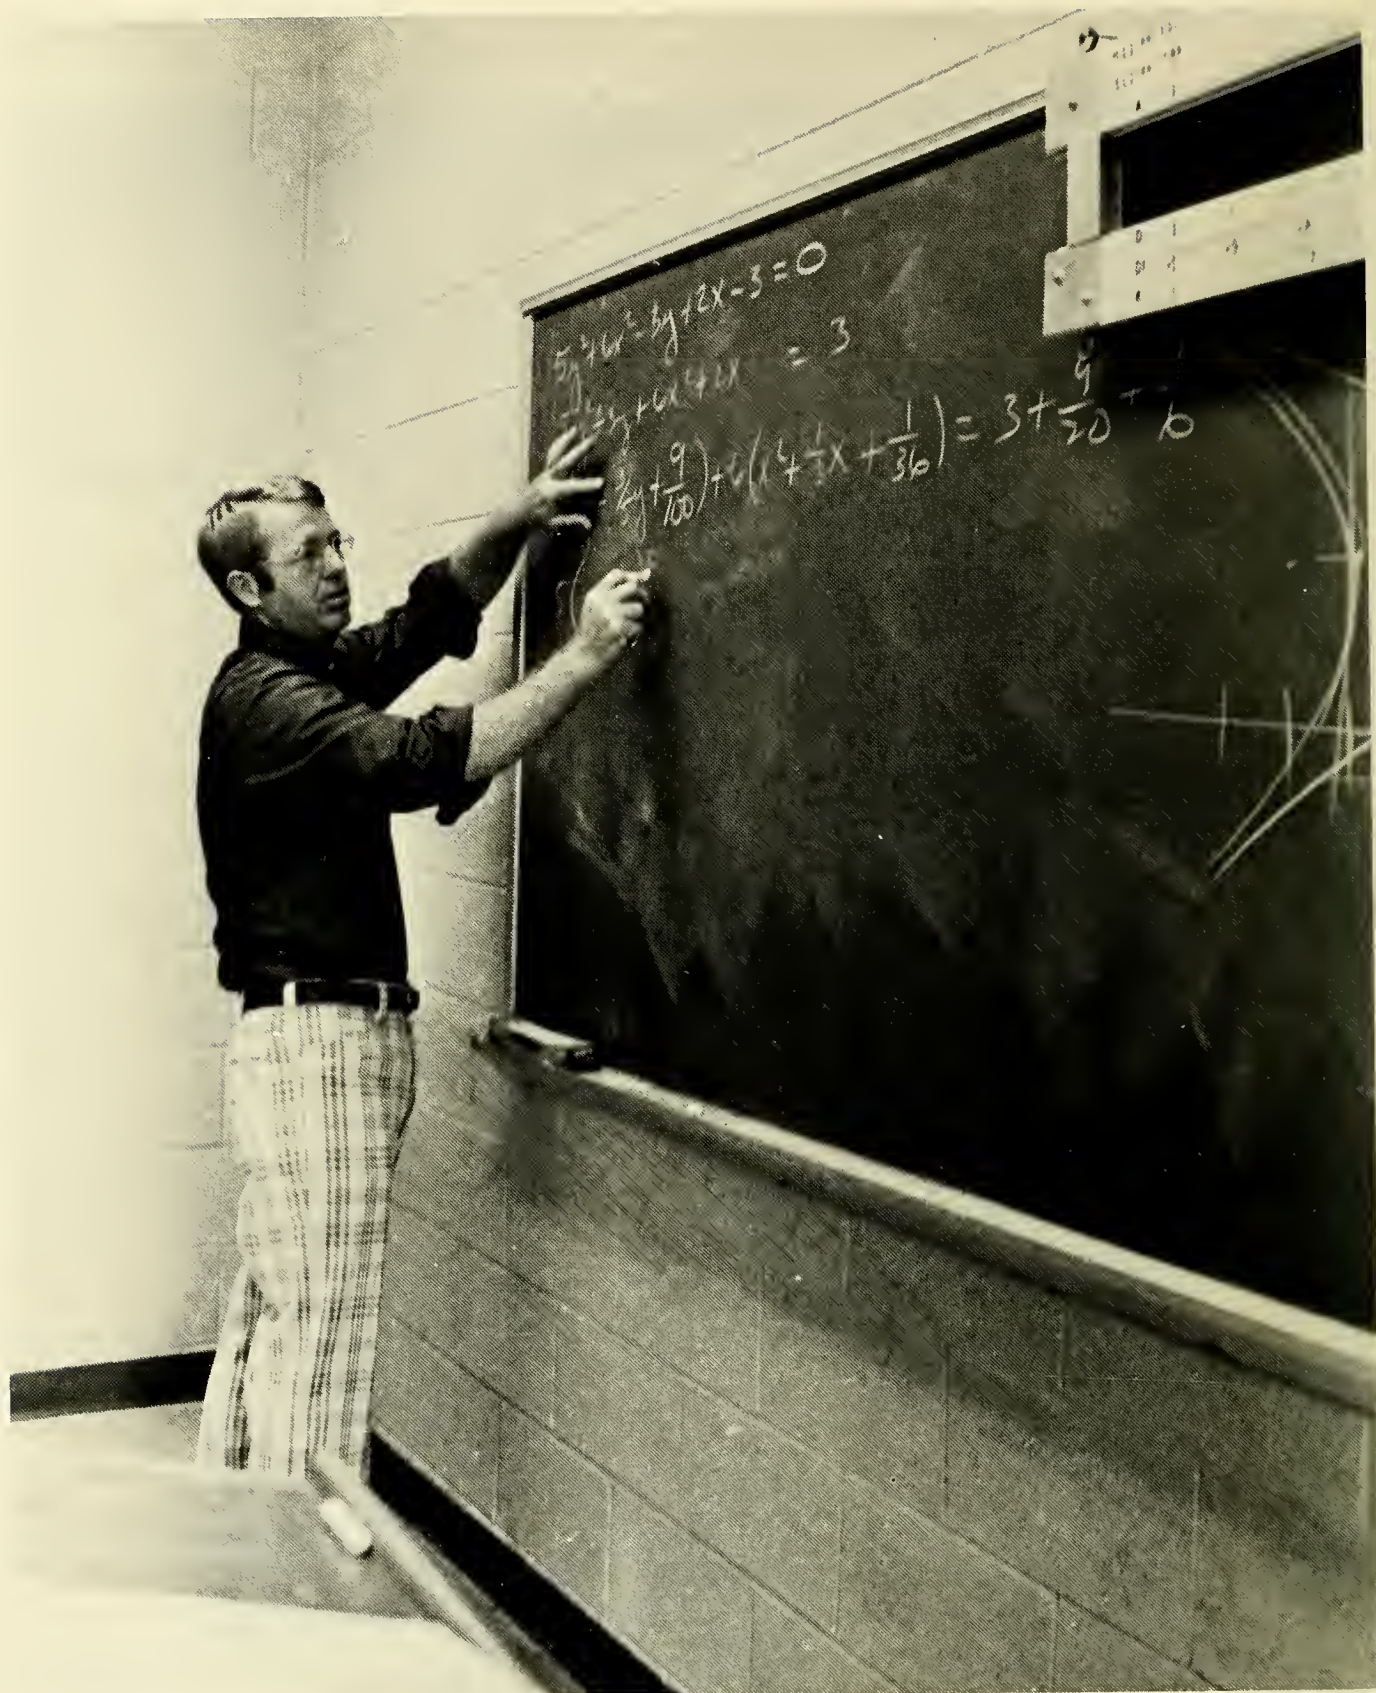

"Those were the days, my friend."

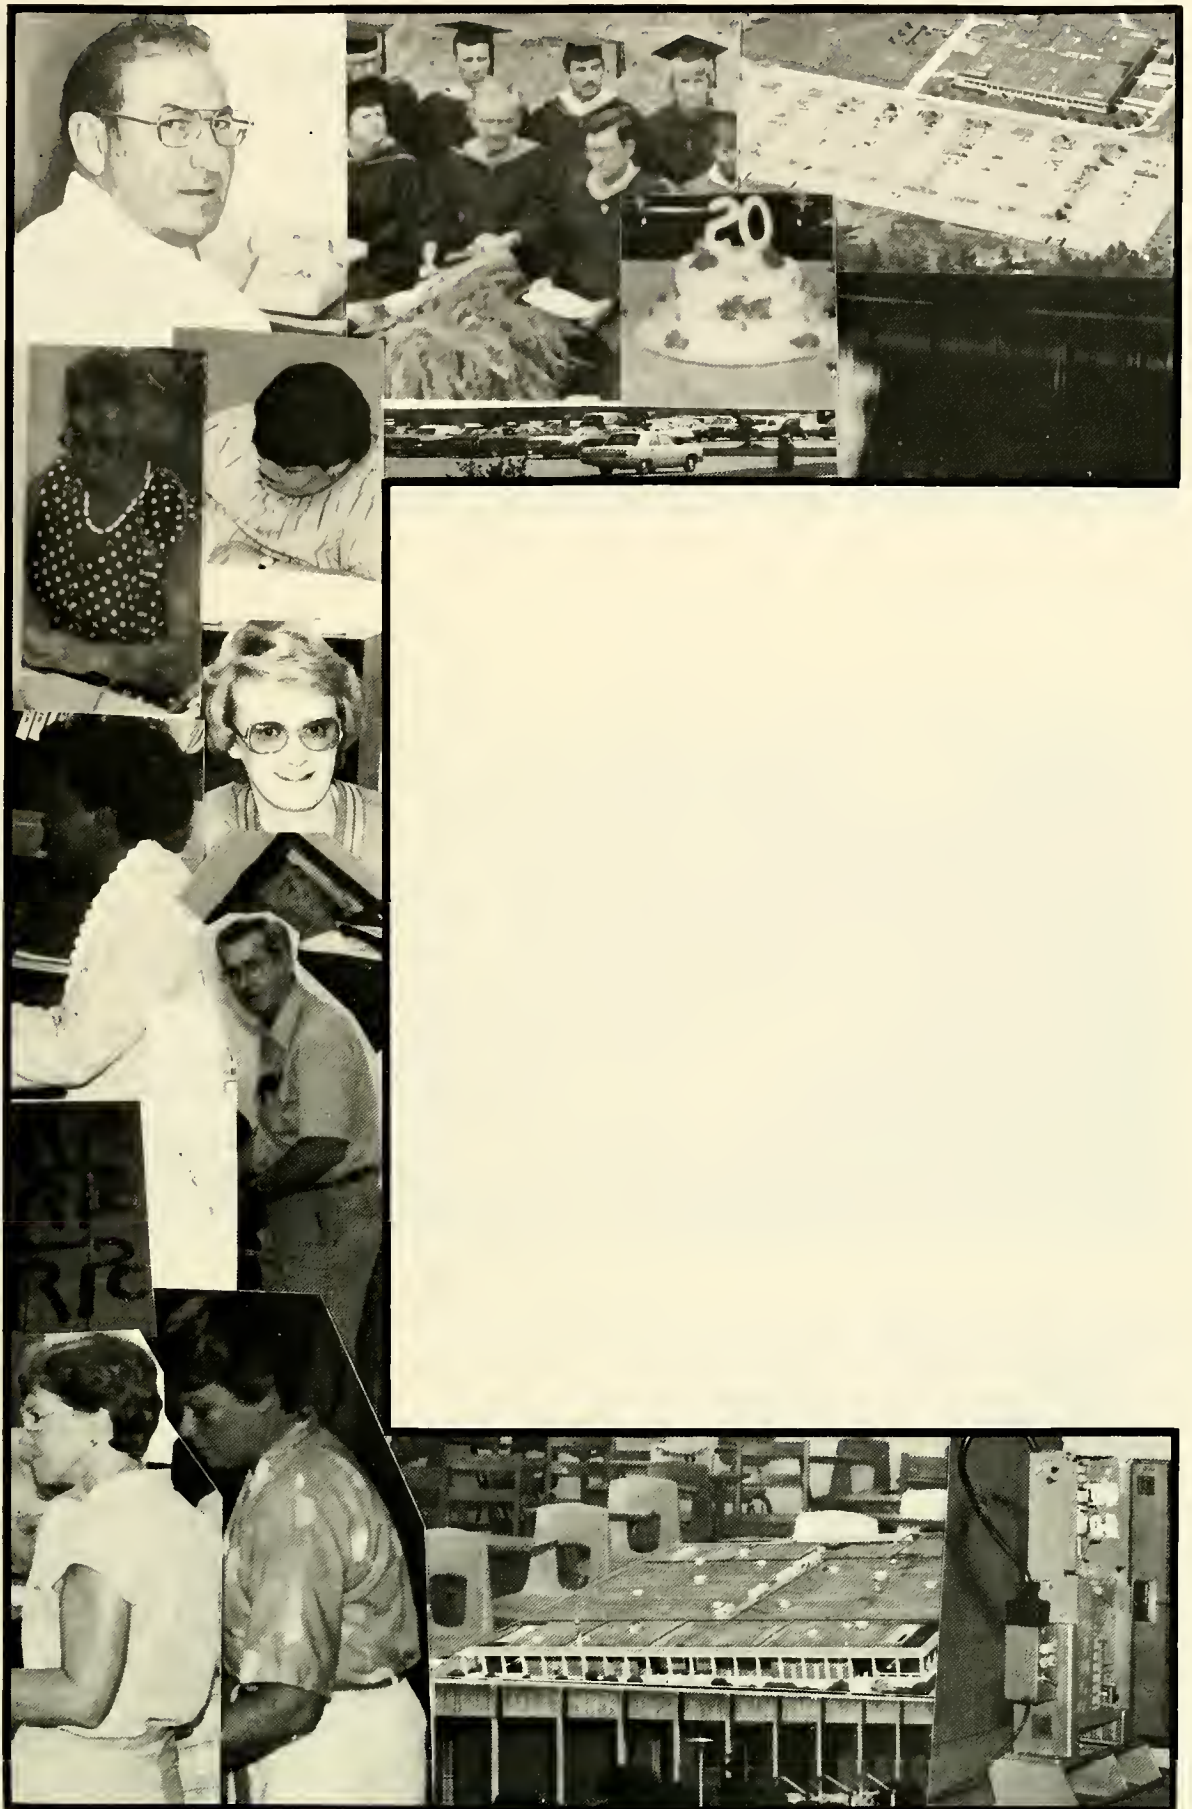

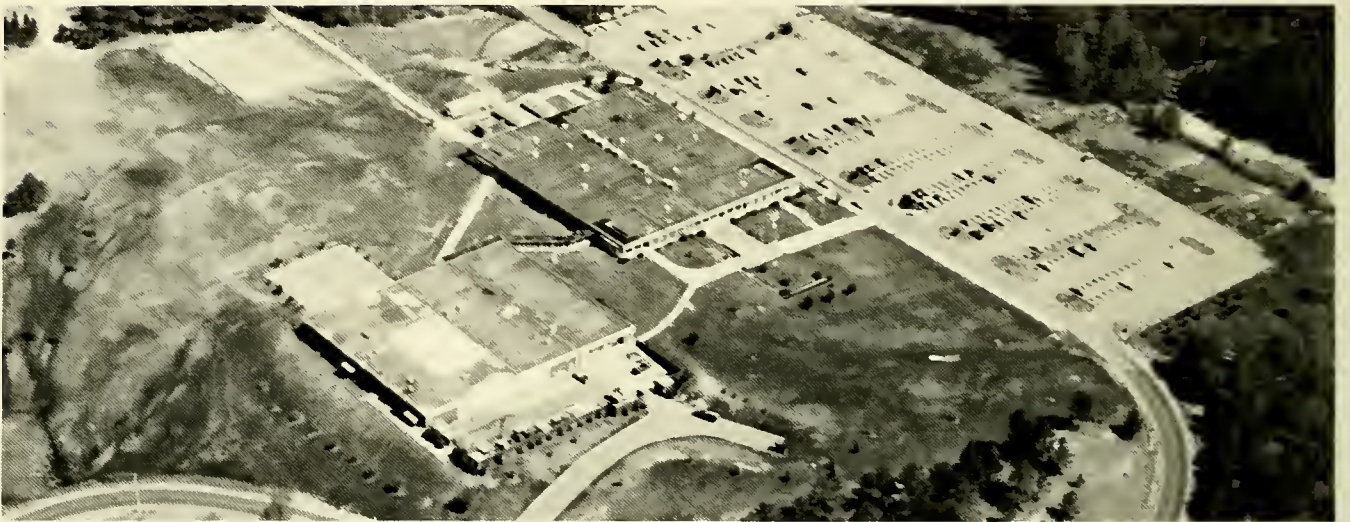

"Will the yearbook be back by Halloween, 1988?"

ACCOUNT- ING

The world runs on money! Those who can keep track of it are valuable commodities in the world's marketplace. In addition, there is tremendous business and industrial expansion. The Accounting program at Richmond Technical College offers the student the opportunity to develop skills in a career field with unlimited opportunity for advancement and income. Upon graduation the accounting graduate will be equipped to enter the fascinating financial world of business, industry, education, or government.

We're so EXCITED!

AIR CONDITIONING & REFRIGERATION

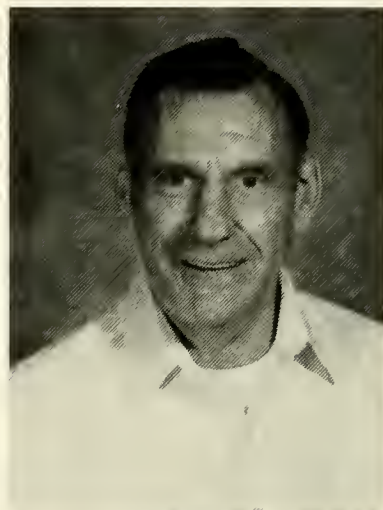

The air conditioning, heating, and refrigeration mechanic is a skilled worker who installs, maintains, services, and repair environmental control systems in residences, department and food stores, office buildings, industries, restaurants, institutions and commercial establishments. Job opportunities exist with companies that specialize in air conditioning, heating and commercial refrigeration installation and servicing. The graduate should be able to assist in installing mechanical equipment, ductwork, and electrical controls necessary in residential and commercial projects. With experience the graduate should be able to service various air conditioning, heating, and refrigeration components, troubleshoot systems, and provide preventive maintenance required of mechanical equipment. The service mechanic is employable in the areas of sales, maintenance, installation, and service in the growing field of air conditioning, heating, and cooling.

AUTOMOTIVE

MECHANICS

Ours is a mobile society, and much of it moves by automobile. With improvements in fuel economy and new developments in sources of new fuels we will probably depend on the use of cars and trucks for many years. Maintenance and preventive maintenance of motor vehicles is big business. You can prepare for your part in this exciting field in RTC's Automotive Mechanics program.

BUSINESS

ADMINISTRATION

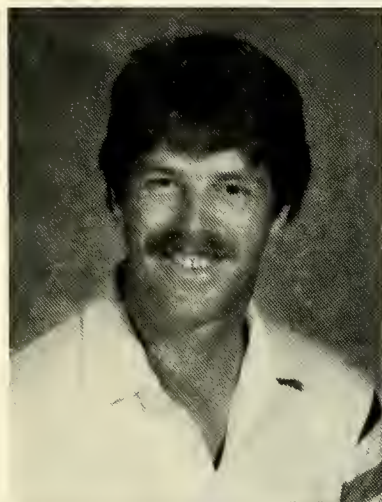

Increasing population and industrial development in North Carolina has made business more competitive and complex. The better opportunities in business will be filled by students with specialized education beyond the high school level. Richmond Technical College's Business Administration Curriculum utilizes a practical approach to the theories involved in efficient management and prepares the student to become a middle management trainee in banking, retail sales, personnel management, insurance, advertising, and the travel, transportation and communications industries.

CARPENTRY

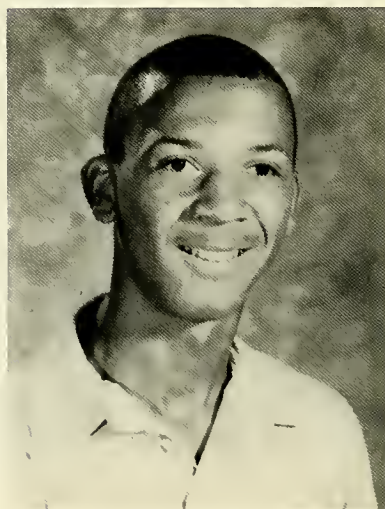

As long as there are buildings, there will be a need for craftsmen who can work with wood and wood products made by nature and by man. Carpentry is a trade as old as civilization and as modern as tomorrow. At Richmond Technical College you can acquire the knowledge and skills you need to become one of these respected craftsmen.

CRIMINAL JUSTICE

A democratic society needs educated men and women in order to attain the essential idea of an effective and equitable criminal justice system. With courses ranging from criminology to psychology, enforcement and corrections to law and rehabilitation, Richmond Technical College's Criminal Justice Curriculum provides a sound basic education for a career in modern law enforcement and corrections.

DATA PROCESSING

Few career opportunities are as wide open and promising as Electronic Data Processing. Three and a half million men and women are needed to staff computer centers throughout the United States. Less than half of the number are currently enrolled in educational programs which will prepare them for careers in this profitable, sky-rocketing field. In the Electronic Data Processing curriculum, you will work with automatic data processing equipment; computer programming; procedures for planning and implementing data processing systems; and accounting and general business procedures. When you're finished, you'll have the knowledge and skills for a career with an unlimited future.

ELECTRONICS

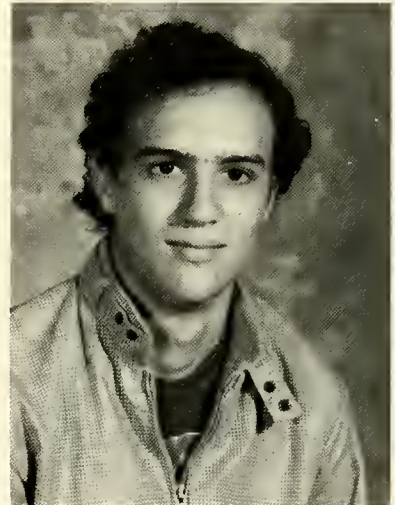

Whether it's electronic technique, electronic service, or electronic installation and maintenance, the name of the game is ELECTRONICS. The electronics laboratory at Richmond Technical College allows not only the electronic technician students to practice their applications in design and development, but also the electronic servicing students to repair and service several types of equipment. It also allows the electrical wiring students to practice on the installation of wiring. These are three wide-open and expanding fields for students who are interested in electronics.

EXECUTIVE

SECRETARY

Elizabeth Austin

An Executive Secretary is a principle assistant to top management. Indispensible in any successful operation, the secretary can work in business, education, industry, government, or service agencies. The executive secretary's skills and abilities are always in demand and can command a substantial salary. Richmond Technical College's Executive Secretary instruction offers you the opportunity to learn these skills and discover your abilities.

GENERAL EDUCATION

The General Education curriculum at RTC provides students within the school's service area an opportunity to earn ninety-six quarter hours of college credit at the technical college tuition cost. The primary purpose of the General Education curriculum is to provide two years of general education for those persons seeking this type of educational experience. These credits also prepare students for a variety of baccalaureate educational programs at a number of four year colleges and universities. This curriculum seeks to help students evaluate information, make informed decisions, communicate clearly, and think creatively.

INDUSTRIAL MAINTENANCE

Alexander Fairley

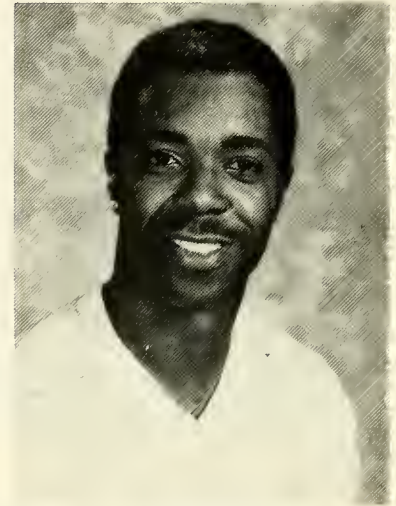

Tyrone Alford

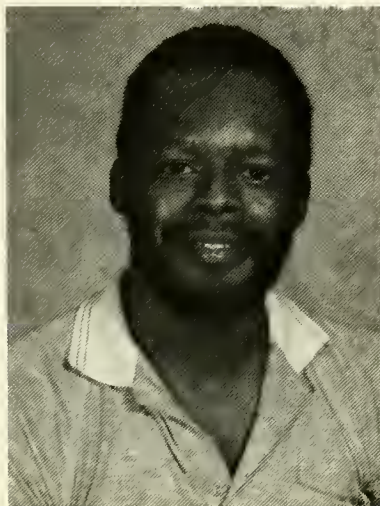

Sander Armstrong

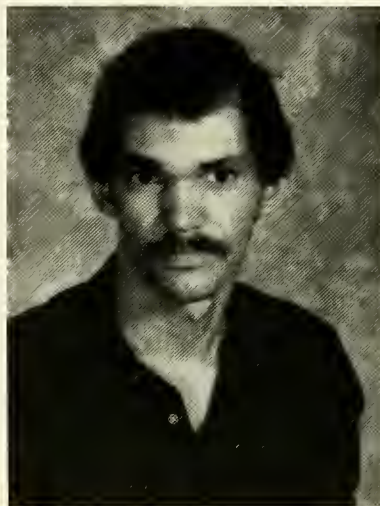

In Industrial Maintenance, you learn to install, maintain, and repair electrical and mechanical equipment used by industry. To do this, you'll learn about blueprints, operating metal-working machines, how to test electrical components, etc. When you're through you're ready to be an electromechanical serviceman—which means you can find a good job in industrial maintenance.

M T A S CHINI

The Machinist is industry's most highly prized craftsman. The machinist's essential skills and knowledge produce work which is not only practical but also beautiful in its precision. The machinist is never dead-ended in a boring production slot. Moreover, for his special skills and knowledge, the machinist earns rewards in pay, status, and satisfaction. At Richmond Technical College, you can begin a challenging, rewarding career as a machinist through expert instruction and versatile shop experience. The machinist trade curriculum is definitely for those who desire a skill in which they can take great pride.

The complex functioning and growth of our mechanized society demands more and more technicians each year. To meet this demand, the Mechanical

Technology curriculum teaches mechanical drafting and engineering analysis preparing the graduate for a profitable future as a technologist who fills

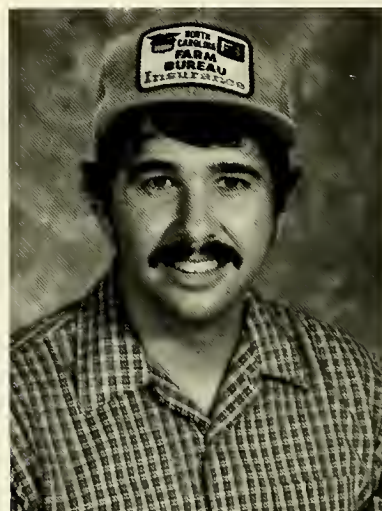

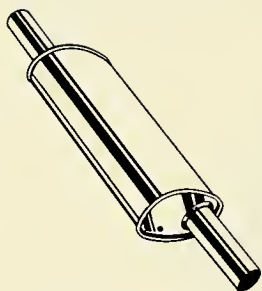

the vital gap between the engineer and the production personnel. Mechanical Technology is a field with a future.

In this annual, the 1984-85 VALIANT, we have strived for a publication that will bring back memories of this school year for the faculty, staff and students. The theme, "A Better Way of Life" was chosen as a representation of the desires of individuals at RTC. These individuals may be students striving for education, teachers striving to educate, or administrators and staff striving to organize, counsel, and expand curriculums for school improvement.

At this time, we would like to thank all the people who cared and devoted their time to this publication.

THANK YOU
